

# WHAT TO EXPECT

## POST-OP COLLAGEN KIT

**QR** Your physician has ordered you a personalized collagen kit to aid in your recovery, to be used after your initial post-op bandages are removed.

**QR** The contents will be Collagen pads and bordered dressing appropriate to incision size.

**QR** Collagen pads aid the healing process by attracting amino acids which are the building blocks of the skin. This will help you heal in a timely manner and help with aesthetics of the wound.

**QR** You will receive your kit one of three ways:

- Drop-shipped to your residence 2-3 days following surgery
- Given to you when you leave surgery center
- Given to you at post-op visit

For video instructions:

- Go to UOC website at [www.uoc.com](http://www.uoc.com)
  - Navigate to the Patient Resources
  - Select Post-Operative Information
  - Select the appropriate Collagen Home Kit Instructions
- or
- Scan QR code with your smartphone

Follow all of your physician's wound care instructions, including a daily dressing change by applying new collagen to each wound site and covering with a new bordered dressing. Please contact Quality Recovery at 888-391-5107 with any product questions and your physician with any wound concerns at 814.231.2101.

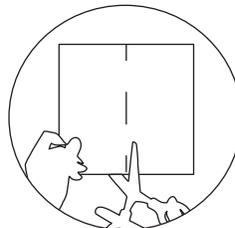

## Personalized Wound Care Kit **Instructions**

### Step 1 Check Your Wound/s

Confirm the wound and/or wounds are clean. Use gauze pads and rubbing alcohol as needed.

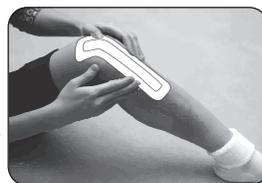

### Step 2 Applying Collagen Pad

Open a NEW STERILE Collagen Pad. Cut the pad to ensure proper pad length for the incision. Place collagen pad on incision, holding in place and apply the following step.

### Step 3 Apply the Bordered Island Dressing

Remove the bordered island dressing from the package. Remove one side of the paper liner. Place dressing over the wound and surrounding skin. Remove the remaining liner. Carefully smooth the edge of the dressing to ensure proper skin contact.

### Step 4 Change the Dressing Daily

Change as directed and repeat steps 1 through 3. When changing, use caution removing bordered island dressing. Please remove the island dressing prior to showering or bathing.

**When to use this kit?** Please follow your physician's instructions. This kit is most likely used following your original dressing protocol.

**Removing the Dressing/s:** Carefully remove the existing island dressing covering each wound.

### Instructions or Product Questions

*For any concerns about your wound, call your physician's office. For detailed usage instructions and a full list of warnings, cautions, and contraindications, always refer to the manufacturer's guidelines for each product included in this kit. The instructions provided by Quality Recovery are merely suggestions on the sequence of product use. However, please note that these products have not been specifically designed or clinically evaluated for their combined use in addressing any particular clinical indication.*

For instructions or product questions, call Quality Recovery at (888) 391-5107.

**STERILE** All Contents Sterile Until Opened

#### WARNINGS:

- Due to risk of infection, discard any product that was used and/or damaged.
- DO NOT use products if you are allergic or sensitive to materials of bovine origin.
- If excessive redness, pain, swelling or blistering occurs discontinue use of Product & Bordered Island Dressing and notify your doctor.

# FREQUENTLY ASKED QUESTIONS

## POST-OP COLLAGEN KIT

- QR** Do I use a new, unopened collagen pad and bordered dressing everyday?
- Yes, your physician has ordered a daily amount per incision. Please use new ones everyday.
- QR** What do I do with the leftover product?
- Not all of the collagen may be needed for your incision. You may discard or add to your home first aid kit.
- QR** Will I get a bill for this?
- This depends on your insurance plan. Your physician has ordered this to supercharge your healing process and this will be billed as a DME product.
- QR** When should I start the use of this kit?
- This kit is to be used after your initial post-op bandages are removed.
- QR** Who do I call for product instructions?
- If you are experiencing any wound complications, call your physician immediately. For product information, please call Quality Recovery: 888.391.5107
